Rupesh Mahat

Quality Assurance & Automation Engineer

PROFILE

Enthusiastic, self-motivated, reliable, responsible and hard-working QA professional. A mature team worker, adaptable to challenging situations, able to work well under pressure and adhere to strict deadlines.

EXPERIENCE

Quality Assurance with Automation Engineer

Apr 2025 - Present

Danfe Solution Pvt. Ltd. — Sinamangal

- Hands-on experience in manual and automation testing, including Selenium with Python, Postman API testing, JIRA for defect management, and JMeter for performance testing.
- Designed detailed test cases, test scenarios, and reporting workflows across modules such as cart, billing, inventory, order management, and restaurant POS systems.
- Analyzed requirements, identified edge cases, and ensured full test coverage across functional and non-functional areas.
- Collaborated with teams, documented defects clearly, and contributed to improving overall software quality and user experience.

Support Engineer

Present

Danfe Solution Pvt. Ltd. — Sinamangal

- Provided technical support to clients by diagnosing and resolving printer-related issues, including connectivity, driver setup, and configuration.
- Managed client interactions, ensured timely issue resolution, and delivered clear communication to maintain strong customer relationships.
- Supported software installation, updates, troubleshooting, and user guidance to ensure smooth system performance.
- Documented issues, solutions, and client feedback to improve service quality and reduce recurring problems.
- Coordinated with internal teams to escalate complex technical issues and ensure quick resolution.

Quality Assurance Intern

Dec 2024 - Apr 2025

Search Eyes Business Solution — Bhaktapur

- Validated complex workflows in ERP and transactional systems (e.g., accounting, HR, inventory).
- Tested UI/UX elements across multiple devices using tools like the Responsive Test Chrome extension.
- Verified payment systems (cash/card), order processing, and data integrity.
- Used tools like Jira, Excel, and API testing tools for tracking bugs and verifying data.
- Collaborated effectively with developers in Agile/Scrum environments, participating in sprints and issue resolution.

EDUCATION

Bachelor in Information Technology Management

Completed

Kantipur College of Management and Information Technology

+2 (Management)

Passout 2075 BS

Modern College of Management — Bhaktapur

SLC

Passout 2072 BS

Gundu English Secondary School — Bhaktapur

TRAINING / CERTIFICATIONS

Quality Assurance — Mindrisers Institute of Technology

- Completed both Manual Testing and Automation Testing (Selenium in Python).
- Mobile Application Testing (Android Studio).
- Project management tools such as Jira and Trello.

Automation Engineer ISTQB – Mindluster

- Learned to automate web application testing using Selenium WebDriver with Python, including locating elements, performing actions, and validating UI behavior.
- Gained experience writing Python test scripts using frameworks like pytest/Unitest, implementing assertions, handling waits, and managing test data.
- Practiced building reusable functions, using the Page Object Model (POM), and organizing test suites for maintainability.

KEY PROJECTS

BricX ERP System

- Conducted functional, integration, and regression testing across key ERP modules (User Management, HR, Inventory, Reporting).
- Verified accuracy of journal voucher creation and financial reports (e.g., Daybooks, Payable/Receivable).
- Created and executed detailed test cases; logged and tracked defects to resolution. Tools: Manual Testing, Excel, Jira.

Phat Online Food Order System

- Tested the online food ordering system for guest and customer accounts, focusing on order placement, payment processing (cash and card), and order tracking.
- Ensured accurate order history tracking and proper payment integration. Tools: Manual & Automation Testing, Figma, Excel, Jira.

E-commerce System (Nepal ↔ USA)

- Tested a cross-border eCommerce platform with payment options for cash and card, validating account, registration, and order processes.
- Ensured accurate order placement, payment processing, and tracking for local and international shipments. Tools: Manual & Automation Testing, Jira, Excel.

Jilla Bachat (Bank Transaction Recording System)

- Tested recording of bank transactions, including creation of main branches and sub-bank accounts.
- Validated transaction entries, financial report generation, and role-based access control. Tools: Manual Testing, Excel, Jira.

QR Digital Menu System

- Tested digital menu access via QR code for hotels and restaurants; checked display, links, and mobile compatibility. Tools: Manual Testing, Excel.

Cloud Restro Order

- Tested restaurant order management workflows including table orders, online orders, take-away, and order updates, ensuring accurate billing and order history.
